PROFESSIONAL SUMMARY

Junior AI Research Associate — Fresher with 0 years of experience. Develop AI-based applications and agents. Work with Python and NLP techniques to analyse data and build intelligent solutions. Work with LLM APIs and Generative AI. Write clean and maintainable code. Skilled in Machine Learning, SQL, Data Analysis, LLMs, Git, and Problem Solving. Bachelor degree in Electronics and related field.

SKILLS REQUIRED

AI & ML: Python, Machine Learning, NLP, Generative AI, LLMs, LLM APIs, Deep Learning, RAG

Data Analysis: SQL, Data Analysis, EDA, Statistics, KPI Reporting, Data Cleaning, MySQL

Tools & Code: Git, GitHub, VS Code | Power BI, Tableau, Excel | Clean Maintainable Code

Core: Problem Solving, Develop AI-based Applications and Agents, Build Intelligent Solutions

EXPERIENCE

Data Analytics Intern — 0 Years Experience | Global Quest Technologies, Bengaluru | Jan 2026

- Developed AI-based applications and agents; worked with Python and NLP techniques to analyse data and build intelligent solutions.
- Worked with LLM APIs and Generative AI; applied Machine Learning and SQL for data analysis; wrote clean and maintainable code; used Git.
- Applied problem solving to design data analysis pipelines; built Power BI dashboards; tracked KPIs for data-driven decision-making.

PROJECTS

AI Resume Screening Agent | Python, NLP, Machine Learning, SQL, Data Analysis, LLMs, Generative AI, LLM APIs, Git, Problem Solving

- Developed AI-based applications and agents using Python and NLP techniques to analyse data from 10+ resumes; applied Machine Learning and problem solving to build intelligent solutions for candidate ranking.
- Worked with LLM APIs and Generative AI to write clean and maintainable code; used Git; SQL and data analysis for structured output.

Hospital Emergency Room Dashboard | Python, SQL, NLP, Machine Learning, Data Analysis, LLMs, Generative AI, Git, Problem Solving

- Developed AI-based applications; worked with Python, NLP techniques, SQL, Machine Learning to analyse data and build intelligent solutions; wrote clean and maintainable code with Git; problem solving for KPI reporting.

Amazon Sales Analysis Dashboard | Python, SQL, Data Analysis, Machine Learning, NLP, Generative AI, LLMs, Git, Problem Solving

- Worked with Python and NLP techniques to analyse data and build intelligent solutions; applied Machine Learning, SQL, data analysis, LLMs, Generative AI, and problem solving; wrote clean maintainable code; Git.

EDUCATION

Bachelor Degree — B.E. Electronics & Communication Engineering, CGPA: 8.1/10 | LAEC College of Engineering | 2022-2026

CERTIFICATIONS

Data Analytics – Deloitte (2026) | SQL – HackerRank (2026) | Advanced Excel – Satish Dhawale (2026) | Data Analytics – HP LIFE (2025) | Aptitude Test – ICAT (2025)
